

To Install the Free Rockworks Rockplot 15 3D Viewer Software

1. Copy the zipped “Rockplot 3D15_Installation” software file provided with the 3D models to your PC’s hard drive at a known location.
2. Navigate to this location on your PC and unzip the zipped installation file (THIS IS AN IMPORTANT STEP).
3. Double click on unzipped installation file and select “Run” to install the Rockplot 15 3D viewer software on your PC.
4. Follow the steps in the installation wizard.

To Open the 3D Model for Each Field

1. Copy or Save 3-D Model zip file for each field to your PC hard drive at a known location.
2. Navigate to this location and unzip the zipped files (THIS IS AN IMPORTANT STEP).
3. Open the Rockplot 15 3D viewer software.
4. Click File/Open and navigate to the unzipped folder that contains the 3D model files for a field.
5. Click on the file *.R3DXML (wait a moment as it sometimes takes a while to load).
6. Once the file is open, you can manipulate the 3D model to view different angles of each field.
